

Ocarina

an interactive sonic media application
version 1.0 design specification
ge, October 2008

by SonicMule
<http://www.smule.com/>

audio playback
plays back selections
of uploaded snippets,
or perhaps in real-time

Real-time Map Display

With the user's permission,
his/her GPS/tower location is
upload to a central smule server;
the server then sends updates
to the phone, which displays /
animates the current ocarina
usage around the world

icons (maybe)

(semi) real-time kjoule map
depends on locale
